Data-quality flags

Invalid GSTIN format: 2 record(s) | Period mismatches: 1 | Duplicate invoices in books: 1

GSTIN check is a format check only (not a live validation). Matching: GSTIN + normalised invoice number first, then same supplier with same taxable value and similar invoice number or date. ITC availability depends on Section 16 conditions (including reflection in GSTR-2B, payment to supplier and time limits) - confirm before reversing or claiming.
